

Fangs and Fur

When an evil scientist starts experimenting on shifters and vampires, trying to uncover the secret to their kind, the races must join together to stop him. In the process, four couples find love and passion beyond any they could have imagined. **Unnatural Bonds:** Kali risks everything to free Riordan from the scientist. Once she succeeds, she isn't certain what to do with him. He has a good idea though ... if she's willing. **Laws of Nature:** When Shaylee escapes from a kidnapping attempt, she manages to get to safety and the shelter of her neighbor Garrett's arms. Once there, she discovers she doesn't want to leave. **Bound in Blood:** Anya is a protector for the vampire race. In the process of taking care of the threat to her people, she meets Ruben, who is delighted to find that she is his mate. Can this strong woman submit to a determined shifter? **Nature of the Beast:** As a councilor for the vampire race, Kathryn has had to make hard choices--including sending Anya to take care of the scientist hunting them. One of the hardest thoughts is accepting that she is a shifter's mate. As a future alpha, Vance isn't willing to accept no for an answer.
